Project Abstract Submission Form

Sec No- 3	Team No-	Project Title- Airline & Airport Mobile App for Passenger Self-Service
-----------	----------	--

1. Abstract

Air travel often involves multiple disconnected processes such as check-in, boarding-pass retrieval, baggage tracking, flight updates, airport navigation, and assistance requests. Passengers may need to interact with different counters, applications, or information screens, resulting in delays, confusion, and an inefficient airport experience. These challenges become more significant during peak travel hours and for passengers unfamiliar with the airport.

Airline & Airport Mobile App for Passenger Self-Service proposes a unified mobile platform that brings essential airline and airport services into a single, user-friendly application. The system enables passengers to perform self-check-in, access digital boarding passes, receive real-time flight and gate notifications, track baggage, explore airport facilities, and obtain personalized navigation and service information. It can also provide features such as automated alerts for gate changes, boarding reminders, and assistance requests.

The proposed solution aims to reduce dependency on physical service counters while improving operational efficiency and passenger convenience. By integrating airline and airport services into one platform, the application creates a seamless **“check-in to boarding” digital journey**. The project focuses on designing a scalable, secure, and responsive self-service ecosystem that can improve passenger satisfaction, reduce airport congestion, and support smarter airport operations.

2. Team Details

Roll Number(s)	Name of the Student	Signature
2520030059	Yalamarty Sathviki	
2520030225	Ramgari Raghuvier	
2520030188	Praneeth	

3. Frameworks / Platforms / Software Used

- **Frontend:** React Native / Flutter
- **Backend:** Node.js + Express.js
- **Database:** MySQL
- **API Development:** REST APIs
- **Authentication:** JWT (JSON Web Tokens)
- **UI/UX Design:** Figma
- **Development Environment:** Visual Studio Code
- **Version Control:** Git & GitHub
- **Testing & API:** Postman
- **Deployment:** Vercel / Render
- **Maps & Navigation:** Google Maps API
- **Development Platform:** Android Studio for mobile testing

Guide Name and Signature (remarks if any) _____
